Description

Eremito is "Contemporary Monastery" with ascetic concept created for a unique travel experience. Eremito is made mostly for the solo traveler and couple find relax. It is a sanctuary for a digital detox experience, a celebration of a simple uncluttered life. There is no internet, no business centers, minibars, or televisions and the dinner is in silence. There is only warm stone and bright stars, wind whispering around the trunks of trees, a river winding its way through verdant hills. Travelers come here to escape, to reconnect with their spiritual self and experience the world free from the tired excesses of society.
